Avril 2024

Deployment of SYGIDAN-RECETTES in 4 new municipalities

In April 2024, the SYGIDAN-RECETTES system was extended to 4 new municipalities: [Assinie](#), [Rubino](#), [Akoupé](#), and [Affery](#).

For the RDF team, the month of April was therefore characterized by a series of activities linked to the deployment and use of the SYGIDAN-Recettes platform within these municipalities, including training courses

for collectors and town hall staff, system configurations adapted to the needs of each municipality, and market tax collection tests in the field.

In addition, N'Douci has already been using the system since early March, while Katiola and Tiapoum plan to deploy it during the month of May. In addition, it is also planned to [expand the collection to other types of taxes](#) during the same month, such as rental leases.

54 agents
trained

44 collection
agents in the
field

43 mobile devices and
printers used by staff of

municipality
(collectors, manager
and financial).

More than 4000
actual payments
recorded in the system.

During the practical test, it is conducted with taxpayers, aiming to **promote taxpayers' adherence** to the system and to minimize resistance to change.

At new

Taxpayers are open to change and express their willingness to collaborate in order to facilitate the

transition.

Some figures from the collection tests

AFFERY

• Training of 07 collectors and the manager. •
Use of 08 smartphones and 08 printers. • Collection
of **326800 XOF** via the platform for **2452** transactions.

N'DOUCI

• Training of 17 people. •
Configuration of 08 telephones. •
Deployment of 06 agents in the field. •
Collection of **161100 XOF** via the platform for **1334** transactions.

ASSINIE

• Training of 9 collectors, 1 manager and 1 RAF. •
Use of 6 telephones and 6 printers. • Collection
of **137,700 XOF** via the platform for **656** transactions.

RUBINO

• Training of 5 people (3 collectors, 1 manager, 1 financier). • Use of
5 telephones and 5 printers. • Collection of
54,400 XOF via the platform for **512** transactions

AKOUBE

• Training of 16 people. •
Configuration of 16 phones. •
Deployment of 16 collectors in the field. •
Collection of **34,800 XOF** via the platform for **256** transactions

Pre-validation Workshop

A pre-validation workshop for the SYGIDAN-RECETTES platform was organized from April 24 to 26, 2024 in Assinie-Mafia. This event, led by the DGGDL within the framework of PAMREC, made it possible to present the software and collect feedback for its improvement.

Suggestions were made by participants to strengthen financial management, data security, and integrate new payment methods. A report was produced to guide the next phases of system improvement.
